

Advance Practice Recruitment Solutions

Morgan Hunter HealthSearch (MHHS) provides advance practice recruitment services to successfully fill Nurse Practitioner (NP) and Physician Assistant (PA) positions for hospitals, physician practices, surgery centers, retail clinics and managed care organizations.

MHHS **Permanent Search Solution** offers a flexible approach to meet each individual client need.

- For a dedicated sourcing effort that provides maximum exposure for your need, MHHS utilizes a Performance-based search process in which we offer the level of service and expertise of a retained firm, while only being guaranteed one-third of our fee with the final two-thirds on a contingent basis.
- Contingency search process in which MHHS receives a fee upon successfully filling the position.
- No search expenses.
- All candidate and referral contact is handled by our consultants (no research assistants), who average more than 30 years experience.

MHHS **Locum Tenens** service provides temporary coverage for vacations, unfilled positions, growth, peak times or any other scenario in which immediate help is required.

- No minimum length of engagement.
- You are able to convert the locum tenen to permanent and all fees already paid are applied to the permanent conversion fee.
- Congingent-based process in which you are free to evaluate our candidates with no obligation.
- Turnaround time to present candidates of three to five business days.
